

OVERHAUL • ARSON INVESTIGATION • WILDLAND

PRODUCT SPECIFICATION SHEET
WHIFFS® MASKS, XCAPER® FILTERS & ACCESSORIES

WHIFFS MASK

Perfect for wildland firefighting, overhaul and arson investigation, the Whiffs Mask is made of Yellow Advance Nomex® with Kevlar®, which carries a 1050°F heat rating. The Whiffs mask is lined with blue Indura® Ultra Soft® cloth with a hydrolone finish. This material helps to wick moisture from the firefighters face and prevents the transfer of radiant heat to the skin. Its sleek design makes the mask comfortable to wear, even in hot climates. The Velcro® attachment points at the bridge of the nose on the outside of the mask are used for attaching the goggles. The other three Velcro attachment points on the outside of the mask are used for attaching the neck shroud (sold separately). When used with an Xcaper moist filter, the Whiffs Mask

provides unparalleled firefighter protection. The Whiffs mask is machine washable in cold water, and should be hung to dry. (Xcaper® filters, Whiffs Shroud, and Goggles are sold separately.)
Weight 2.1 Oz

WHIFFS SHROUD

The Whiffs Shroud fits the Whiffs Mask and is made of Advance Nomex which carries a 1050°F heat rating. The Shroud is lined with blue Indura Ultra Soft cloth with a hydrolone finish. This material helps to wick moisture from the firefighters face and prevents the transfer of radiant heat to the skin. It is the perfect accessory when more protection is needed. The three Velcro attachment points on the inside of the shroud should be used to attach to the Whiffs mask. The shroud is machine washable in cold water, and should be hung to dry.

Weight 2.6 Oz

MANTA X® 20 or MANTA X 30

The Manta X (available in two sizes, 20 & 30) is made of Carbon X® material and Kevlar® elastic with Nomex thread. The Manta X is easy to use just like a Bandana. The Manta X is made of stretchable material which makes it easy to pull down and up when needed. Used with an Xcaper Filter (which absorbs 100% of particulate matter and filters CO, Hydrogen Cyanide, Acrolein, and other gases common to wildland

and structure fires) you have the perfect combination of protection for a single days use. The filter Velcro's to the inside of the bandana.

WHIFFS TAC-AIR-PRO® MASK

Specifically designed for law enforcement operations, the Tac-Air-Pro Mask is made of Black Advance Nomex® with Kevlar®, which has a 1050° F radiant heat rating. The breathing port of the mask is also made of Nomex. The Tac-Air-Pro Mask also has an Indura thermal barrier to stop the transfer of heat. Its sleek design makes the mask comfortable to wear, even in hot climates. The Velcro attachment points at the bridge of the nose on the outside of the mask are used for attaching the goggles; and as a method of keeping the mask from slipping. The Tac-Air-Pro Mask is machine washable in cold water, and should be hung to dry. *Weight 2.2 Oz*

XCAPER FILTER

The Xcaper filter delivers unparalleled protection by trapping particulate matter and absorbing hazardous gasses common to the smoke in fires. They are made to be used with the Whiffs Mask, Tac-Air-Pro Mask or Manta X 20 or 30, and are ideal for wildland fires and structural overhaul, as well as for arson investigation and SWAT operations. The combination of materials that make up the Xcaper moist filters provides a product that one can breathe through with little resistance. The filter comes in a vacuum sealed foil bag that should not be opened prior to use. Once removed from the vacuum sealed foil bag, the filter is intended for a single days use. *Weight 1.8 Oz, each*

WHIFFS CARRY BAG (Available in BLACK or YELLOW)

The Whiffs carry bag is perfect for carrying up to five Xcaper filters with a Whiffs Mask & Shroud, a Tack-Air-Pro mask, or a Manta X 20 or 30. The carry bag is made of Indura rugged cloth and it has a hook fastener on one end, and draw cord with stop lock on the other end for easy access. *10" (H) x 4" (L) x 4" (W); Weight 1.7 Oz*
